Motor Carriers

Blume Logistics features include:

- **Intelligent Carrier Selection:** Automated carrier selection based on configured business rules and performance metrics.
- **Drayage Marketplace:** Find drayage capacity on demand in real time.
- **Shipment Planning and Optimization:** Optimized order consolidation and route planning to create efficient shipments.
- **Carrier Performance:** Select the best carrier for the job by evaluating them using a central repository of carrier performance metrics and compliance tracking.
- **Freight Audit and Pay:** Manage end-to-end financial process from pre-move rating to automated auditing, invoicing and payment.

ROI Checklist

All in one: Blume's digital operating platform empowers you to plan, book, execute, settle and track shipments without toggling among applications, reducing errors while increasing execution speed, bolstering customer happiness and revenue.

Unearth hidden capacity: Find new capacity on Blume's ecosystem of organically growing multimodal network of air, ocean, road and rail carriers.

Best-in-Class visibility: Provide customers with the most accurate predictive ETA and lead times, decreasing "where's my shipment" inquiries and lowering administrative costs.

Reduce carbon emissions: Lower transportation expense due to empty mile reduction and lower CO₂ emissions.

About Blume Global

Blume Global is a multimodal supply chain orchestration platform that unites end-to-end visibility, supplier management and logistics execution. As the single source of truth for logistics data, Blume provides visibility throughout the value chain, from sourcing to delivery, allowing customers to use Blume solutions to navigate disruptions and create agile plans amid supply chain uncertainty. Blume has the most extensive network among logistics technology providers. The company's direct connectivity to the ocean, air, rail, parcel, LTL and truckload carriers combines with Blume's solutions and rich history of providing industry data to maximize transportation spend, improve customer service and reduce carbon emissions for users. By developing technology that streamlines the logistics world, Blume Global is leading the industry in creating supply chain sustainability solutions, fighting climate change by eliminating significant carbon emissions in a world where most freight is transported using fossil fuels.
