Blume Supply Chain Orchestration
Combine real-time visibility with logistics execution

Blume Supply Chain Orchestration enables collaboration among buyers, suppliers and logistics providers, nurturing resilient and agile processes with tactical planning, execution and end-to-end supply chain visibility from manufacturing through in-transit logistics.

Blume Orchestration provides:

- **Strategic Supply Sourcing:** Cultivate resiliency by sourcing the best company for your evolving supply chain, every single time.

- **Supplier Order Collaboration:** Establish standardized order and change process among suppliers and other stakeholders.

- **Transportation Management:** Plan shipments, seamlessly book multimodal shipments and manage contracts on the platform, a networked partner ecosystem.

- **End-to-End Visibility:** Move beyond track and trace with predictive ETA and lead times, interline schedules, and on-time performance with health indicators.

- **Control Tower:** Create agile supply chains by empowering customers and their partners with visibility into disruptions, along with the means to resolve exceptions.

ROI Checklist

Onboard and manage suppliers effectively, reducing sourcing costs through competitive bidding.

Centralize PO collaboration with your suppliers including logistics service providers to reduce redundant work while increasing visibility and control.

Optimize spend by planning shipments intelligently by finding the logistics operations (packaging, containers, shipment instructions) needed to transport the items from origin to destination.

Manage by exception by identifying and prioritizing opportunities and issues in real-time, quickly responding to make sure freight gets to its destination on time.

About Blume Global

Blume Global is a multimodal supply chain orchestration platform that unites end-to-end visibility, supplier management and logistics execution. As the single source of truth for logistics data, Blume provides visibility throughout the value chain, from sourcing to delivery, allowing customers to use Blume solutions to navigate disruptions and create agile plans amid supply chain uncertainty. Blume has the most extensive network among logistics technology providers. The company's direct connectivity to the ocean, air, rail, parcel, LTL and truckload carriers combines with Blume's solutions and rich history of providing industry data to maximize transportation spend, improve customer service and reduce carbon emissions for users. By developing technology that streamlines the logistics world, Blume Global is leading the industry in creating supply chain sustainability solutions, fighting climate change by eliminating significant carbon emissions in a world where most freight is transported using fossil fuels.
